SNORKELING, YES OR NO?

My essay is about my opinion on snorkeling which is an aquatic sport without oxygen bottles.

Snorkeling is an aquatic sport without oxygen bottles, you only need a face mask, fins and a snorkel. This activity that deal on swimming across the surface of the water with a snorkel in coral reefs. (you do not need so much detail since this is not a descriptive essay, but an opinion one!!!)

Snorkeling is good and for me it is a great activity because people are nearby of the oceanic world, while people don’t break the corals the snorkeling is good. Also, this sport can raise a lot of money because it is a magnet for the tourism. This activity is very beautiful and interesting.

I think that snorkeling is good, while people keep the nature safe.

Could you add some more ideas about how to keep nature safe??
Also, remember to add one more picture!!!
