SNORKELING

I talk am going to write about my opinion of snorkeling in coral reefs.

Snorkeling should not be prohibited, because it’s nice; I am happy when I look at the fish and the corals, … It’s not contaminating a polluting activity, you can see sponges, fish, corals, polyps, medusas,… It’s very beautiful to see the sea bottom marine. Snorkeling should not be prohibited but it should not be out of control.

Many reefs are very fragile, if we go snorkeling, we can look but we must not touch any part of them.

Your essay is short and you are also missing the two pictures that you should have included
